

Sprint 2 Plan

Project name: Adult Friend Locator

Team name: Adults

Sprint Completion Date: 3/1/17

Revision Date: 2/12/17

Team Members

- Alice: Developer
- Brian: Developer
- Kyle: Developer
- Sean: Scrum Master
- Luke: Project Owner

Scrum Times

- Mondays: 12 PM section (E2 194) with TA
- Thursdays: 6 PM (Baskins 316)
- Fridays: After class (Baskins 316)

Goals

- Connecting a user to their friend, and displaying their location
- Keeping track of connected users friends and their locations, as well as keeping them updated on both the server and client
- Sending notifications to the client about any updates (friend changes, location, etc)

User Stories

- [5] As an adult with friends, I want to be able to easily share my location with my friends.
 - [done] Send location to server [kyle]
 - [3 hours] Server routes location to friend [brian, alice, sean]
 - [2 hrs] Share/request location button [kyle]
 - [3 hours] server routes requests to friend [brian, alice, sean]
 - [2 hours] Map ui with location pin [kyle, luke]
- [5] As an adult with friends, I want to be able to find individual users on the app so I can get their location and find them in the real world
 - [1 hr] Query server database for specific friend [sean, alice, brian]
 - [3 hours] Add to friends list on device [sean, alice, brian]
 - [3 hours] Send friends list to client on request [sean, alice, brian]
 - [6 hours] Friends list ui [kyle, luke]
- [2] As an adult with friends, I want to be able to receive notifications on people's locations.
 - [6 hours] connect server and client via push notification [everyone]
 - [8 hours] display page for the notifications [luke, kyle]
