Sprint 3 Report
Project name: Adult Friend Locator
Team name: Adults
March 17, 2017

Actions to stop doing
- The team should stop attempting to problem-solve blocks during the daily scrum meetings, because the meetings are longer and less effective that way.

Actions to start doing
- The team should schedule more meetings apart from the weekly scrum meetings, because the members need to be together physically in order to plan out how to synchronize server-side and client-side functionality.

Actions to keep doing
- The team should continue to all get together to talk to the TA during the scheduled meeting time, because it allows everyone to be able to talk to and receive feedback from the TA about their current process.
- The team should continue to accomplish all of the goals that were specified in the sprint plan.

Work completed
- As an adult with friends, I want to be able to easily share my location with my friends.
- As an adult with friends, I want to be able to find individual users on the app so I can get their location and find them in the real world.
- As an adult with friends, I want to be able to receive notifications about people's location requests.
- As a adult with friends trying to find their friends, I want the app to help me find them visually or on the app map because I'm directionally challenged.
- As an adult with friends, I want to be able to quickly and easily see my adult friends location while on the move.

Work not completed
- As an adult with friends, I want to be able to broadcast my location to all adults on my friends list.
- As an adult with friend, I want to be able to attach messages with my location sharing.
  - Create an in-app chat system

Work completed
- Total number of user stories completed during the prior sprint: 5
- Total number of estimated ideal work hours completed during the prior sprint: 31

- Total number of days during the prior sprint: 15
- User stories/day: (5 user stories) / (15 days) = 0.33
- Ideal work hours/day: (31 hours) / (15 days) = 2.07
